Experiment - 11 a)

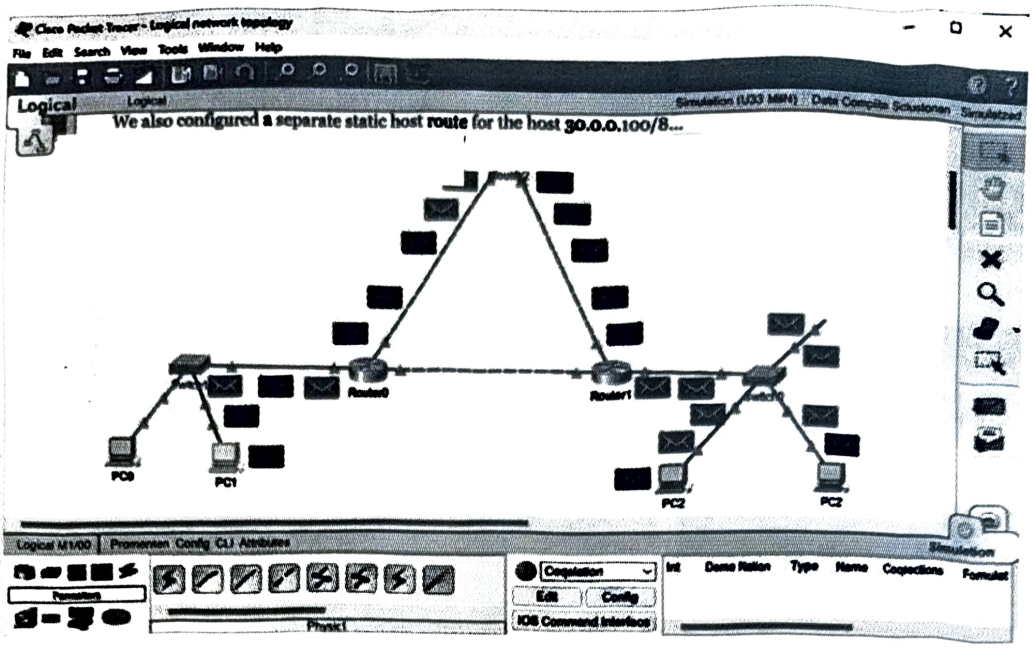

STATIC ROUTING

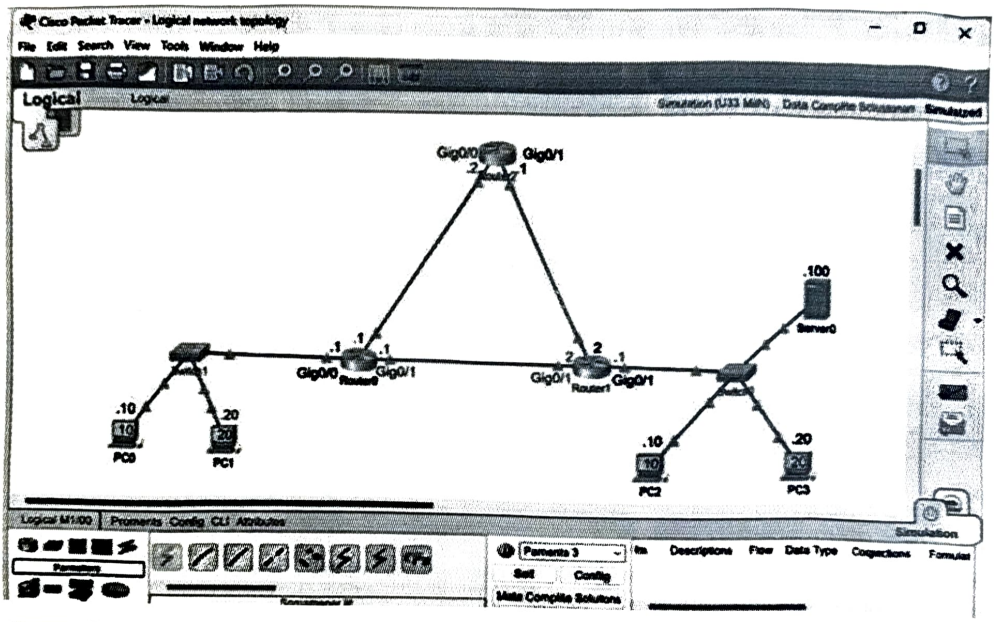

Aim:

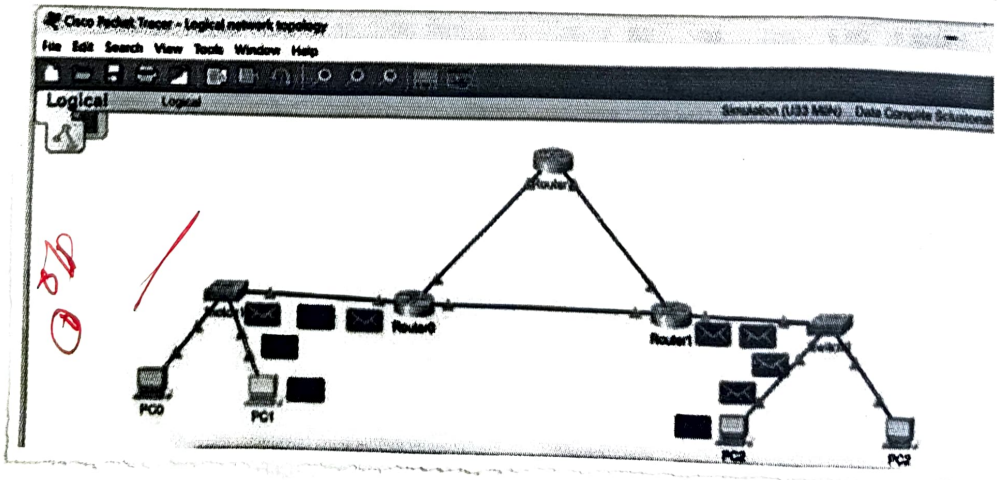

To configure static routing using cisco Packet Tracer.

Algorithm:-

1) Open cisco Packet Tracer
2) Create the required routers and pc topology
3) Connect the devices using suitable cables.
4) Assign IP addresses to PCs and router interface
5) Enable routers interfaces using no shutdown
6) Configure static routes using IP route
7) Configure the required backup route
8) check the routing table using show IP route
9) Test connectivity using Ping
10) Verify communication between the networks.

Result:

Thus the echo client server was successfully implemented using sockets.
