Experiment - 11 b) RIP ROUTING

Aim:
To configure RIP routing using cisco Packet Tracer

Algorithm:

1) Open cisco Packet Tracer.
2) Create the required routers & PC topology
3) Connect the devices using suitable cables.
4) Assign IP address to PCs and router interface
5) Enable router interface using no shutdown
6) Enter RIP configuration mode using router rip.
7) Add connected networks using network commands.
8) Configure RIP on required routers.
9) Check the routing table.
10) Test connectivity using ping.

Result:-
Thus, RIP routing was successfully configured & connectivity between the networks was verified.
