Experiment 12 a)

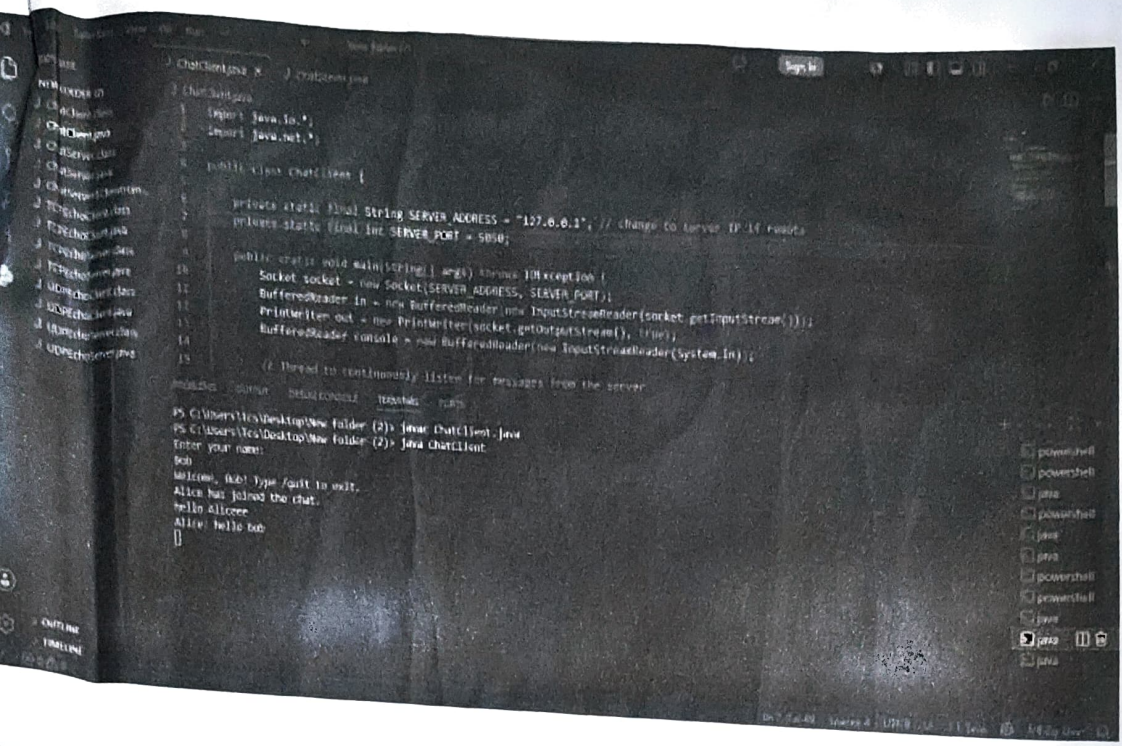

ECHO CLIENT- SERVER

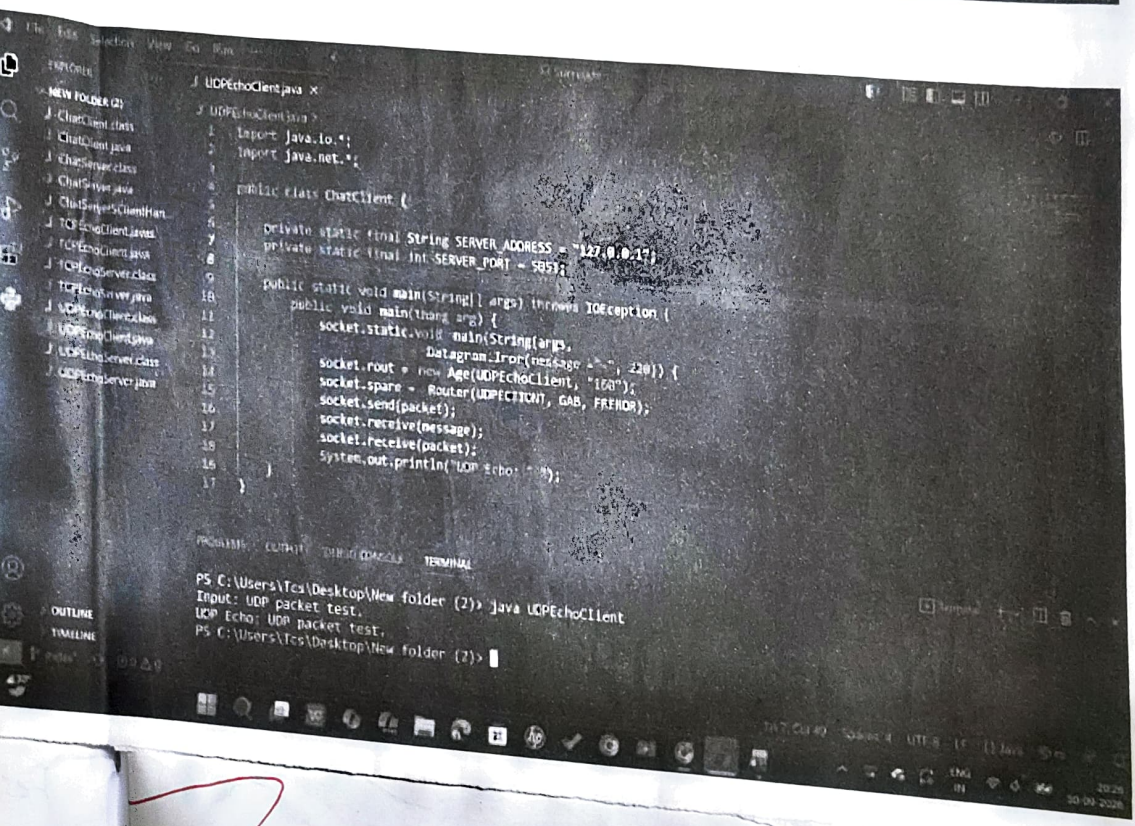

Aim:

To Implement an echo client - server using TCP/UDP sockets.

Algorithm:

1) Create the server socket
2) Bind the socket to an IP address & port
3) Create the client socket
4) Connect the client to the server
5) Enter a message from the client.
6) Send the message to the server
7) Server recive and echos the message
8) Client recives the echoed message
9) Close the sockets.

Result -

This echo client server was successfully and implemented using socket
